Our next SBE Chapter 80 meeting will be on Tuesday March 20th at the Out O Town Club at noon.

Chairman's Corner

In February we had a great meeting featuring a program from Alex Bonello of INSOFT LLC discussing a novel video/audio mixer package. This product is well suited for radio stations to stream video and audio together to accompany their existing programming. We also had several new faces attend the meeting so that was exciting as well. It was the first meeting conducted by our new slate of officers for 2018, so that was even more change.

I'd like to thank everyone who served last term for doing a great job in 2017 – everyone who stood for election in 2018 for their willingness to serve the Chapter– and an especially big thank you to those that serve in appointed offices doing their respective tasks year after year for the good of the Chapter. Please offer them a word of thanks next time you see them – we sure do not want to take them for granted!

Remember that this is the final month of the National SBE membership drive – think of someone you know who should be a member and encourage them to join. Some employers will even pay all or part of your membership dues if you explain how the organization can help you become a better and more well connected engineer.

Hope to see you at the meeting this month!

Steve Brown, Chairman
Fox Valley SBE Chapter 80 Inc.

Join Us for Module 3 of the Broadcast Infrastructure Cybersecurity Webinar Series on March 27

SBE's four-part **Broadcast Infrastructure Cybersecurity** webinar series continues this month with **Module 3: Understanding the Secured Remote Access** on **Tuesday, March 27 from 2 pm - 3:30 pm ET.**

The series provides an understanding of IP network security terminology, security plan principals, best practices, proactive implementation techniques and active security verification. Practical implementation examples utilizing popular network infrastructure equipment will be provided with public domain security assessment tools.

Module 3: Understanding Secured Remote Access will discuss how to establish a secured remote access. This session also reviews VPN implementation and configuration.

The webinar is presented by Wayne Pecena, CPBE, 8-VSB, AMD, DRB, CBNE, assistant director of educational broadcast services in the Office of Information Technology at Texas A&M University.

Completing the series is **Module 4: Security Verification Thru Penetration Testing, Tuesday, April 24, 2018 from 2 p.m. - 3:30 p.m. ET.** It will cover proactive security monitoring and an overview of network penetration testing and network presentation testing tools, with examples.

If you did not get to participate in **Module 1: Introduction & Network Security Principals** or **Module 2: Understanding the Firewall**, the webinar is now ON DEMAND and can be accessed using the registration link below.
